Nonfiction text structure worksheet pdf

Text structures are ways that texts can be organized. Some common types include chronological order, cause and effect, and compare and contrast. Some paragraphs use multiple types of text structures. Some use no discernible structure. That's why I made these worksheets. These worksheets feature paragraphs that are clearly organized using one of these patterns of organization. Students are required to identify how the text is structured. Then, to help them focus their critical thinking skills, they are to use information from each passage in a graphic organizer. This will help them make connections between text and visual representations of text. Identifying Text Structure 1: Read the passages. Identify the text structure. Write information from the passage into the appropriate graphic organizer. Graphic organizers are available at the top of the page.
